Subject: RE: I/M/O Lansing Rod and Gun Club Docket No. RCRA-02-2016-7301 [IWOV-Active.FID1716645]

Ms. Hayden,

In our August 13, 2018 e-mail we indicated that the Club was preparing an application for a building permit for the warming hut and two trap houses. Following consultation with Town officials, the Club retained a professional engineer who is preparing detailed location drawings of the trap and pistol ranges as part of that application. Because the trap range's relocation requires clearing of trees from a small wooded area – leaving stumps in place – to establish an open and safe field of fire for the shooters, a Stormwater Pollution Prevention Plan (SWPPP) addressing erosion and sedimentation control is also being developed to accompany the Club's building permit application to the Town. The Town is a Municipal Separate Storm Sewer System (MS4) jurisdiction and has been delegated responsibility from the New York State Department of Environmental Conservation to review and approve such SWPPPs. To date, these are the only approvals that the Town has indicated are required for the proposed work.

We have been told that the application package may be ready for submittal as early as next week, and we are hoping that the Town will expedite its review and approval. Once approval is granted, the ranges can be opened quickly – as soon as the two small “trap house” structures (which are simple 10 x 10 foot sheds holding the clay pigeon launching equipment) are constructed.

Thank you,
Tom

Subject: I/M/O Lansing Rod and Gun Club Docket No. RCRA-02-2016-7301

Dear Messrs. Oropallo and Paul,

This email communication is sent to follow up on your August 13, 2018 email communication reply to my August 3, 2018 and August 6, 2018 email communications.

In your August 13, 2018 reply, you indicated that the Club had applied for a building permit to construct the warming hut or shed at the Site. Was the permit application approved? Did construction on the building commence? Are there any additional permits that the Club is required to obtain?

Please provide EPA with an update with regard to the status of the permit at your earliest opportunity. Thank you in advance.

Sincerely,

Melva J. Hayden
